

What's the biggest cause of global warming?

A. Raising animals for food!

B. All transportation combined!

C. Lightbulbs, showers, and not recycling!

If you guessed A, raising animals for food you are right. Raising animals for food contributes more to global warming than all transportation combined! And it also causes more global warming than old fashioned light bulbs, showers, and not recycling. So three times everyday, there is a way that you can help mother earth, and that is by eating more plant foods!
